

Gandhi-ji's Glasses

You need:

Two paper cups, scissors and cellotape.

Start off:

1. Cut out the bottom and the rim from the paper cup.

2. Ask an adult to help you cut out the central part of the bottom of the cups. This leaves you a ring. Pic. 1.

3. Repeat for the other cup.

4. Now use cellotape to tape the rings together.

5. Straighten out the rims that you had cut out, at one end. Leave the other end curling in. Use cellotape to tape the straightened end to the outside of the smaller rings (which you taped together earlier).

See pic. 2.

THINK

ABOUT

THIS

Answer to question in the previous issue.

Q: Why do we have wax in our ear?
Ans.: Earwax protects the ear from germs, bacteria, insects and also water. It protects the delicate skin of the ear canal and also keeps it from getting very dry.

Your glasses are ready. Curl them around your ears and perch them on your noses - like them?!
